

Patina · Building English

Build It: Where Is It?

one block in Flatbush, Brooklyn

★ build one true sentence · ★★ build one with **between** · ★★★ build one the map says is false, and say why

Build the sentence left to right. Count first, then look at the map. Your sentence has to be true on this street.

There is/are what where which place and which place .

Two things are yours to get right. Count first: a bank → there is, two banks → there are. Then the map decides the rest, so read the street above before you choose the green words.

There is / There are	What	Where	Place	and place
There is	a bank	next to	the post office	the post office
There are	a library	across from	the library	the library
	a pharmacy	between	the bank	the bank
	a restaurant	on the corner of	the restaurant	the restaurant
	a coffee shop		the school	the school
	an apartment building		the coffee shop	the coffee shop
	two banks		the supermarket	the supermarket
	two places		the pharmacy	the pharmacy
			the apartment building	the apartment building

Between always needs two places and the word and. When you choose between, a second place opens.
